# FIXED ASSETS MANAGEMENT SYSTEM

## GENERAL FEATURES

- Multi-level user access and control (Admin or User)
- Can Upload data by batch through Mass Upload or one by one which can be done using "Add New" Function User Interface
- Better monitoring or tracking of Asset Inventory
- Asset Analysis Report (i.e. Fully Depreciated & Asset Value)
- With system Audit Trail per user account
- Ability to back-up database anytime within the software

## SYSTEM REQUIREMENTS

- Intel Core 2 Duo (or higher)
- At least 2 GB RAM / memory
- 8 GB Hard Drive Disk Space
- Windows 7(32-bit)
- Windows 8 (32-bit)
- Windows 10 (32-bit and 64-bit)

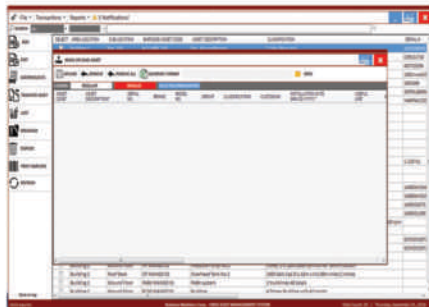

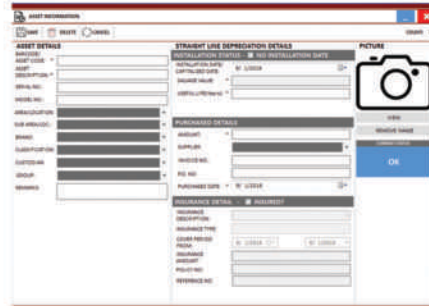

## STANDARD FEATURES

distributed by BISMAC

### Maintenance Module

Used to add,edit,delete and find specific(one by one) information such as Asset Information Details,Brand, Classification,Custodian,Sub-location,Group, Insurance,Supplier and User Access Restriction

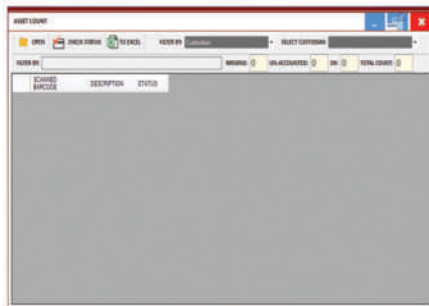

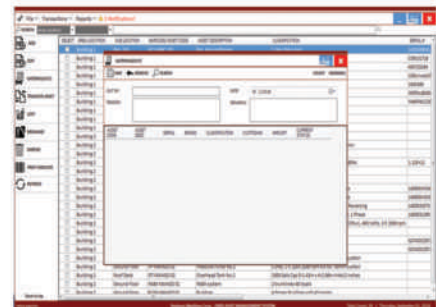

### Mass Upload

Uploads data by group/batch at once by filling out the excel format which can be generated from the system and validates data before saving to the database

### Asset Movement

Monitors the movement of the Fixed Assets - Gatepass(out),Return(in), and Transfer (If you transfer an asset to another Area Location, need to Gatepass (Out) then Add new asset to the new location)

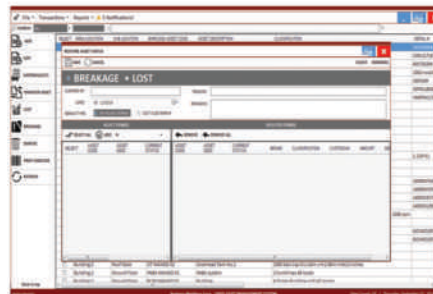

### Asset Count

Allows the user/s to match up or verify the asset listed on the database along with the result of their physical assets inventory

### Asset Restoration

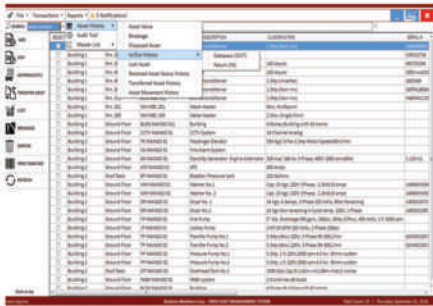

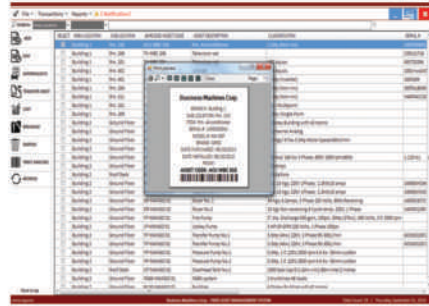

Used to restore asset status thus changing its current DAMAGED or LOST status into OK status

## STANDARD FEATURES

### Barcode Printing

Allows the user/s to generate barcoded labels containing the desired information to be attached on the fixed asset

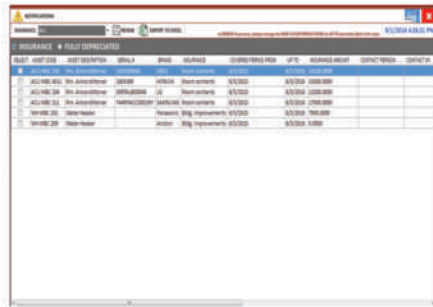

### Reports

Structured reports can be generated (i.e. Asset Value Report, Asset Transfer History Report) and can be customized if required

### Notifications

Monitors and notifies the user/s whenever there is an asset/s that is nearly at the end of life (depreciation) or its insurance needs to be renewed based on its value given in the alert setting module

### Audit Trail

Provides a complete history of transactions performed by the user/s
